ENVIRONMENTAL POLICY OF SUPRAVIS S.A.

Preventing and minimizing the environmental and climate impact, as well as the reasonable consumption of natural resources, are of fundamental importance to SUPRAVIS S.A. These commitments are aligned with the principles of sustainable development, stakeholder expectations, and the responsibility towards future generations.

SUPRAVIS S.A. operations are accompanied by technical and organizational measures based on the best available techniques, focusing on reducing the environmental and climate impact. Adhering to high environmental standards is crucial for maintaining the Company's competitive position in the plastics packaging market.

By continuously improving the Environmental Management System, the Company's top management is committed to:

- Complying with and adhering to the requirements of applicable environmental protection laws and regulations, as well as other related obligations;
- Using environmental resources responsibly, and preventing or minimizing adverse environment and climate impacts by improving and technologically advancing processes, reducing the amount of waste generated, limiting pollution emissions to the air, and preventing accidents;
- Responsibly implementing new solutions and innovations, including assessing their environmental and climate impacts during the design phase;
- Using chemicals responsibly, ensuring their impact on the environment is assessed and minimized;
- Enhancing professional qualifications and environmental awareness of employees, as well as fostering pro-ecological attitudes among the workforce;
- Providing adequate resources and means to implement the Environmental Policy.

This Policy is publicly available and known to employees as well as to other individuals working for the Company.
